The actual work of constructing the big irrigating project on the Valdez ranch, eight miles west of Springer, Colfax county, a description of which recently appeared in the columns of the Range, will begin in the spring. Final surveys are now being made, and at least 10,000 acres of the big 18,000 acre tract will be placed under cultivation. When the reservoir and irrigating ditches are completed, the land will be subdivided and placed on the market in 40-acre and 80-acre tracts. Among the first settlers will be a community of Dunkards, known the country over as the best farmers and stock growers in the land, as well as ideal citizens.

The Farmers' Development company, which is the name of the operating syndicate, is composed principally of practical farmers, and will incorporate soon with a capital of either \$250,000 or \$500,000.

pally of practical farmers, and will incorporate soon with a capital of either \$250,000 or \$500,000.

The capitalists composing the company are M. N. Mikesell of Pittsburg, Pa., treasurer of the Sanitary Chemical company; A. F. Mikesell of Covington, O., a retired farmer; I. H. Rosenberg of Covington, O., another retired farmer; Rev. Isaac Franz of Pleasant Hill, O.; D. G. Wenrick of Bradford, O., secretary and treasurer of the German Baptist Insurance association; J. Wasson of McComb, O., cashier of the People's Banking company; F. D. Rosenberger of Leipsic, O., cashier of the Bank of Leipsic, and I. B. Miller of Gettysburg, O., a merchant.

In an interview with a representative of the Santa Fe New Mexican, Mr. M. N. Mikesell said: "The Valdez ranch which will be the scene of our operations was purchased about three months ago. Although the deal has been closed for some time it was not made public until a few days ago on account of the delay in securing the title to the land. We have deferred the incorporation of the company until all of the little details have been properly attended to and

straightened out. We have had surveys run for the ditches and civil engineers have just started to work on the reservoir end of the project. We have not figured out yet just what its capacity will be but it will cover an area of about 5,000 square feet. If it is not large enough to store sufficient water for irrigating at least ten thousand acres we will build smaller reservoirs later.

"The Rayado river from which our water supply will be drawn, is a fine mountain stream which has a good flow all the year around. The ranch will be split up in small farms which will be sold in the main to new settlers. Some of the land is already under cultivation in alfalfa. Good crops of alfalfa can be raised on the ranch, and a considerable part of the land will be planted in apple orchards."

A Rocky Mountain club has been formed in New York, and provision will be made for a home in that city for residents and former residents of the Rocky Mountain region. A register will be provided so that out-of-town residents may keep their friends advised as to their whereabouts.
